

abc PHARMA

HEALTHCARE | abc PHARMA

- Our dedicated team of pharma experts is constantly ready for new challenges, whether this involves transporting of MRI/MRT machines, blood samples, vaccines, laboratory equipment to biopharma products
- Highest priority for booking and cargo loading
- Special monitoring from acceptance to delivery
- Strict discretion and confidential handling

EXPERTISE

- ABC ensures that the transportation of each shipment is conform with all applicable guidelines and regulations such as IATA PCR Chapter 17
- CEIV certification process to be completed before the end of 2016
- Specially-trained and certified staff in handling pharmaceutical and healthcare products
- Enhanced organisational structure taking the special “pharma needs” into account
- The airline guarantees safe and secure transportation and delivery

In order to ensure the temperature control, we offer:

- *Temperature monitoring and control during flight and on the ground*
- *Temperature controlled ground handling facilities at majority of stations throughout the ABC network (cool and ambient temperature facilities)*
- *For the majority of stations reefer trucks can be organized*
- *Transportation and availability of active containers throughout our network*
- *Installation of temperature controlled cells in SVO*
- *Availability of latest generation thermal blankets*

OUR AIRCRAFT

- Our aircraft have a state of the art environmental control system that allows to reduce the humidity, control the pressure and set four independently controlled temperatures in the cargo compartments
- Each cargo compartment can be temperature controlled, with temperature settings between +4°C and +29°C
- Possibility to accompany your shipment with certified temperature data logger

GENERAL

- Full transparency at each stage of transportation coordinated by our dedicated Customer Service Team (24/7) and supported by an online Track & Trace system at www.airbridgecargo.com
