

PRESS RELEASE

08.07.2007 | AIRBRIDGECARGO AIRLINES MET WITH REPRESENTATIVES OF THE LEADING TRANSPORT COMPANIES IN ST. PETERSBURG

AirBridgeCargo Airlines (ABC), Russia's largest all-cargo airline, met with representatives of the leading transport companies in St. Petersburg today to promote new opportunities for logistics solutions with the Russian Far East, Europe, Japan and China.

AirBridge commenced operations in St. Petersburg in spring 2007. The airline's Boeing 747 freighters serve the city on a routing from Frankfurt to St. Petersburg and from St. Petersburg to Shanghai/Peking. ABC is the first airline to offer scheduled B747F cargo operations in the northwest of Russia and also provides road transport services from St. Petersburg to 15 other major cities in the region.

The presentation to partners and potential clients provided an update on the new services as well as the main advantages of the 747F and aircraft loading and unloading processes. Participants also took part in a special ABC quiz, based of information communicated during the day, with the winner receiving an original flying jacket.
