

PRESS RELEASE

28.01.2015 | AIRBRIDGECARGO SAYS 'HELLO' TO HELSINKI

Helsinki, Finland, is the latest addition to AirBridgeCargo Airlines' (ABC) fast-growing international network, with twice-weekly Boeing 747 freighter services commenced on 26 January 2015. The flights every Monday and Friday will operate from Moscow's Sheremetyevo airport to Helsinki, returning to Moscow via Frankfurt.

The new service will offer even more connection opportunities for ABC's customers, providing smooth, reliable and fast services from Asia to Helsinki and back again well within 48 hours, including handling.

"In 2014, thanks to our customers' support and the exemplary effort and attitude of our full cargo team worldwide, we have been able to grow our business while maintaining a strong performance for our customers. Over the course of the year, we successfully increased our tonnage from North America and Asia to Europe by providing our customers with the capacity and routes their businesses needed. This new service from and to Helsinki will allow us to support the import and export flows which require direct Helsinki service. Furthermore we will also offer trucking services to the Baltic region and Scandinavia" said Robert van de Weg, ABC's Senior Vice President, Sales & Marketing.

During the last five years ABC has been one of the world's fastest growing international cargo airlines with a compound growth rate of 11%. In the European market, the airline has been growing at an average 9% over this period.
